

13J Series

The 13J series is a lead-wired temperature measurement sensor for applications where small size and fast response time is required. Its design is focused on the heater requirements and widely used in dry and high temperature environments. UL recognized models available upon request.

Specifications

- Thermal time constant 0.9 to 5sec (dependant on configuration) (measured: 25°C air to 85°C stirred water, 63.2% ΔT)
- Operating temperature range -40°C to 175°C (dependant on shrink tube and wire rating)
- Insulation strength 600VAC/0.5mA/2sec (dependant on shrink tube rating)
- Stable performance and high degree of accuracy
